
WSU Graduate Student Grant Support Program for Research on Alcohol and Drug Abuse Spring 2016

*(Please see separate announcements
for faculty and post-doctoral fellows)*

PURPOSE

The purpose of the Alcohol and Drug Abuse Research Program is to foster research at Washington State University that will provide significant and innovative contributions to behavioral, psychosocial, biomedical or clinical research on alcohol and drug abuse. Applications for funding research dealing with alcohol or any drug that is recognized by the NIH as an abused drug are welcome. Projects should be directly applicable to addiction, harm reduction, prevention, or drug or alcohol effects. If researchers have any question about the suitability of a potential grant application, they should contact the ADARP office at least one week before the grant deadline.

Alcohol and Drug Abuse Research Program funds will be used to provide research support for behavioral, psychosocial, biomedical or clinical investigators to develop their research capabilities and to demonstrate the merit of their research ideas, productivity, and creativity. A description of the program and a list of researchers can be found on our website: www.public.wsu.edu/~adarp/.

ELIGIBILITY & TERMS OF SUPPORT

Support is for one semester or one summer at your standard departmental stipend level plus a \$3,000 supply budget. Equipment cannot be budgeted via this mechanism. Tuition waivers may be awarded with semester projects but are unavailable in the summer.

IMPORTANT REGULATIONS

Each faculty member may submit only one grant as primary mentor on a graduate student grant, one grant as PI on a faculty grant, and one grant as primary mentor on a post-doc grant. Awards to each research group (faculty member and direct advisees) will be capped at a total of \$35,000 with the following exception: Post-doc salary and benefits count toward the \$35,000 cap. If the post-doc is eligible for an NRSA or K99 award, supply and equipment costs will not count toward the \$35,000 cap, otherwise they will.

APPLICATION

This call for grants is designed to promote graduate student research projects on WSU campuses that have potential to generate extramural funding. Also, funds may be used by individuals who have submitted extramural proposals that were favorably reviewed but not funded. *These individuals should include a copy of the grant that was submitted, the critique, and the priority score received.* Typically, ADARP funds are used for pilot research that provides the foundation for an extramural proposal.

All applications will be **due by 5:00 p.m. on Wednesday, March 9, 2016.** The review process will be completed by June, and awards will be effective on or after July 1, 2016, pending approval of human or animal subject protocol by the WSU Institutional Review Board (IRB) or the WSU Institutional Animal Care and Use Committee (IACUC). Researchers wishing to expedite the IRB or IACUC process may submit the appropriate forms at the same time they submit grant applications.

REVIEW PROCESS

The proposal will be reviewed by a committee of WSU faculty knowledgeable in the area of the proposal. External *ad hoc* reviewers may be solicited. Most committee members will have had a national competitive award.

Grant proposals should be carefully developed and written to encourage positive consideration of research ideas. Grant applications that do not comply with the page limit will be returned.

APPLICATION FORMAT

- I. E-REX Form
 - II. Face Page (name, position, department, submission date, proposal title, and abstract)
 - III. Response to previous critique (for resubmitted applications only - maximum of 1 extra page)
 - IV. Specific Aims (maximum 1 page)
 - V. Significance
 - VI. Innovation
 - VII. Approach
 - VIII. References
 - IX. Detailed budget with brief justification (dates and amount of salary and benefits for one semester or summer, details of supply budget up to \$3,000)
 - X. Biosketch (five-page NIH format including other support and overlap with this proposal, biosketches for each co-investigator should be included)
 - XI. Plans for obtaining extramural funding and/or benefit to WSU or to the state of Washington
 - XII. List of all grant applications submitted in the past three years related to substance abuse research, if any
 - XIII. Letter of support from primary mentor
 - XIV. Names of 5-6 possible reviewers, preferably from WSU (any campus)
- **All sections MUST be received on time if the grant is to be reviewed.**
- **Grants are submitted via e-REX by home department. Hard copies are not required.**

Maximum 6 pages
for sections V-VII

REVIEW CRITERIA

The proposals will be reviewed by the committee according to the following criteria (adapted from the NIH):

1. **Significance.** Does the project address an important problem or a critical barrier to progress in the field? If the aims of the project are achieved, how will scientific knowledge, technical capability, and/or clinical practice be improved?
2. **Innovation.** Does the application challenge and seek to shift current research or clinical practice paradigms by using novel theoretical concepts, approaches or methodologies, instrumentation, or interventions?
3. **Investigators.** Are the PIs, collaborators, and other researchers well suited to the project? Do they have appropriate experience and training? If the project is collaborative, do the investigators have complementary and integrated expertise?
4. **Approach.** Are the overall strategy, methodology, and analyses well reasoned and appropriate to accomplish the specific aims of the project? Are potential problems, alternative strategies, and benchmarks for success presented? If the project is in the early stages of development, will the strategy establish feasibility and will particularly risky aspects be managed?
5. **Extramural Funding Potential.** Likelihood of the project ultimately receiving extramural support.
6. **Budget.** Appropriateness of the budget.
